

# CCTV INSTALLATIONS

*A bespoke CCTV system with us gives you the confidence that your loved ones and properties are safe 24/7.*

# OUR SERVICE

**Put your property's security in focus with an individually designed and installed CCTV security system.**

Our CCTV service can offer a versatile range of systems, CCTV with remote monitoring for a surveillance personnel team, live viewing cameras that you can access through a digital device, and stand-alone systems that can be viewed on-site. The versatility of CCTV offers various security responses, depending on the breadth of your needs.

We individually design the system layout for each camera on your property and take into consideration how cameras will work together, positioning them to maximise visible coverage and minimise the potential for blind spots. The distribution of multiple cameras creates an imposing security presence, which is highly effective at repelling potential criminals and criminal behaviour.

### **CCTV FEATURES:**

- **Line crossing and intrusion detection technology**
  - **Facial recognition**
