

# INTERNATIONAL INSTALLATIONS

INTERNATIONAL  
INSTALLATIONS

*On hand to design,  
manage, and  
install bespoke  
security systems  
for your properties  
across the globe.*

# OUR SERVICE

**Proudly supporting all your security needs with bespoke systems installed across your complete property portfolio.**

Our international services allow you to have security for multiple properties in multiple countries all through one security source. Removing the inconvenience of finding, contacting, and arranging subcontractors for every country, we can manage them all.

With the infrastructure to install, monitor, and maintain your systems around the world, we offer a consistent level of service and workmanship with every installation; our engineer teams are held to the highest standard within the security industry no matter where they carry out work.

We provide intruder alarm, CCTV, and access control systems internationally, as well as highly successful combinations of these. Additionally, we are able to offer an alarm and CCTV remote viewing service from our UK head office to any property, with a compatible system, across the globe. With the ownership of multiple properties comes the need to manage their individual security when you are not in residence, we are pleased to offer this service that can eliminate this burden and provide you peace of mind.

### **INTERNATIONAL SERVICES:**

- **Intruder alarms**
  - **CCTV**
  - **Access Control**
  - **Video Entry**
  - **Monitored intruder alert system**
  - **Annual servicing and maintenance**
